

The Purdue University Center for Cancer Research is continually exploring new methods of treating cancer, techniques to detect cancer and preventative measures that we can share with our partners in the medical industry. By working together with cancer specialists on what patients need, we are able to expand our expertise and provide headway in clinical trials and get valuable information to the public more efficiently.

Novel and new ideas cost money, which is why your impact at the Purdue University Center for Cancer Research is valued and appreciated. It's because of your generosity that we are able to be one of the leading NCI basic cancer centers in the United States. Thank you for believing in us and for being a valued partner.

A special thanks to each and every one of you! You have made it possible to be where we are today. Thank you!!
